7 Radiators Aklimat MV

MV radiator is composed of two inseparable sections, provided with control valve (1), manual control protective cap (2), external thread coupling G3/4" for bottom connection (3), closing off kit with an air vent valve (4) and assembly kit (5). MV radiators allow connection on right-hand or left-hand side (to be specified in the order). MV radiators may be assembled according to the desired specification in the factory or the MV set is delivered separately and assembled by a plumber.

The price of MV radiators is calculated so as to add an amount of 21,41 EUR to the price of an M radiator with the same number of sections.

Example of price calculation for a 10-section MV 500 radiator

Price of MS 500 section is EUR 10,04 (see Aklimat M pricelist)
 Extra price for MV model is EUR 21,41 (see Aklimat M pricelist)
 Total price of 10-section MV 500 radiator:
 $(10,04 \times 10) + 21,41 = 121,81 \text{ EUR}$
